

klean  kanteen®  
2019 Collection

# Built with Love

We've always been more comfortable sitting around a campfire than a boardroom table, more at home on the trail than the corporate treadmill. So how did we end up launching a global company and starting a revolution?

It's hard to imagine that back in the early 2000s you couldn't buy a reusable, stainless steel water bottle in the United States. Plastic was pretty much your only option. When we sold the first BPA-free stainless steel bottles in 2004, we figured a few folks might be into them.

Today, reusable water bottles and coffee mugs are everywhere. Klean Kanteen has become an international brand and has inspired dozens of other companies to make reusable stainless steel products. We don't mind. When it comes to kicking plastic, we're all in this together.

Along the way, we've remained a family- and employee-owned company. Turning down investor dollars isn't always easy, but the freedom to stay true to our principles is worth it. If we want to share our profits with organizations we believe in, we can (and do). If we want to spend a few years developing a ground-breaking nontoxic, chip-resistant powder coat finish, we can (and did).

From the very beginning, Klean Kanteens have been built with love—the love of adventure, the love of conserving wild places, and the love of replacing single-use plastic.

# New TK Closure™

Our cutting-edge TK Closure takes thermal performance to a whole new level. We've replaced the traditional external thread closure system on our lids and bottles with a revolutionary internal thread design for optimal

thermal performance. This new design pairs with our award-winning Climate Lock™ double-wall vacuum insulation to create a stronger insulated barrier inside your Kanteen.

# Klean Coat™

As a company, we make hard decisions when we know they are the right ones. Our new Klean Coat is one of those tough choices. We wanted to switch to a more durable powder coat finish a few years ago but we needed time to do it right. We partnered with the nonprofit Clean Production Action and utilized their rigorous chemical hazard assessment tool, GreenScreen® for Safer Chemicals, to develop a custom powder coat finish that goes above and beyond regulatory standards.

We won't lie ... it was hard to wait, but we're glad we did. Our new finish is safe for people and the planet and four times more durable. In fact, Klean Coat has become the new industry standard for safety and durability.

# New Products to Fuel Your Life

We've updated our popular Insulated Wide line with the new TK Closure™ internal thread design and applied it to our new compatible caps. Better thermal performance and more versatility has turned this old favorite into a new star.

# NEW TKWide

## Vacuum Insulated

Our new vacuum-insulated TKWide line features TK Closure™ internal thread design and award-winning Climate Lock™ double-wall vacuum insulation for leading edge thermal performance. TKWides are made for life with a chip-resistant Klean Coat™ finish, and four compatible low profile caps with easy-carry swivel loops.

### Features

- TK Closure internal thread design featured on bottles pairs with TKWide caps to increase thermal performance
- Climate Lock double-wall vacuum insulation keeps contents hot or cold for hours
- 18/8 food-grade stainless steel
- Won't retain or impart flavors
- Wide opening fits ice, fills and pours easily
- Slim design fits in most cup holders
- Comes with leakproof Café Cap
- Dishwasher safe (Brushed Stainless only)

# NEW Kid Kanteen®

## Single Wall

If your kids are like ours, life isn't easy for their Kid Kanteens. Kids play hard, and so do their Kanteens. Fortunately, their bottle won't get scraped up as easily as they do. Our new, chip-resistant Klean Coat™ finish is four times more durable than our previous paint. Now in fun colors and designs.

# Baby Bottles

## Single Wall

Our Kid Kanteen® Baby Bottles meet regulatory standards for children's products and have a wide mouth that makes filling and cleaning easy. (Take that, sleep deprivation!) With age-appropriate flow rates, they promote natural, relaxed feedings and proper digestion.

## Features

- Easy-to-read measurements on the inside and outside of the bottle
- Wide mouth for easy filling, pouring, and cleaning
- Wide base and nipple shape encourage proper latch
- Food-grade silicone nipple
- Double-venting reduces nipple collapse
- Nipple flow rates allow natural-paced, relaxed feedings
- No BPA, phthalates, or lead
- Dishwasher safe
